IFCCI Committees E-NEWSLETTER

5th Edition

JUNE - DECEMBER 2024

Visit Our Website
www.ifcci.org.in

MESSAGE FROM THE DIRECTOR GENERAL, IFCCI

PAYAL S. KANWAR

Dear Members,

Greetings from IFCCI!

It brings me immense pride to share the **next edition of the IFCCI Committees E-Newsletter**, covering the dynamic activities and impactful initiatives of our **17 sectoral and functional committees** from **June to December 2024**.

Over the past six months, our committees have continued to serve as a vital platform for fostering collaborations, sharing knowledge, and addressing challenges across diverse sectors. From hosting over **35 activities in a span of 6 months**, including **advocacy meetings, flagship events, thought leadership and knowledge-sharing sessions**, to publishing knowledge papers, we have strived to create opportunities that add value to our members and strengthen Indo-French business relations.

This edition highlights key milestones, including the **2nd editions of the Indo-French Sustainability Conclave and CSR Connect Seminar**, the **6th edition of the IFCCI CSR Conclave & Awards**, the **Annual National Committees Meet, CEO Committee Meetings**, and other significant engagements with government and industry leaders.

A key focus last year has been **policy advocacy**. We have established a strong working relationship with DPIIT, addressing industry issues through our committees. In October, IFCCI came out with a White Paper on Policy and Regulatory Insights and Recommendations by French subsidiaries in India across sectors and presented it to the DPIIT for their consideration.

The newsletter also offers a glimpse into our upcoming initiatives aimed at strengthening bilateral cooperation between India and France. Notable among these are our annual flagship events: **the Union Budget Seminar** (in association with the Embassy of France), the **HR Conclave and Awards**, the inaugural **IFCCI Marcom Fest**, and the much-anticipated **2nd Edition of the IFCCI Luxury Symposium**, all scheduled over the next two months.

On behalf of IFCCI, I extend my heartfelt gratitude to our committee leaders, partners and members for their unwavering support and contribution.

As we move forward, I encourage all members to actively engage with our committees and leverage this platform to achieve shared goals.

INDUSTRY PERSPECTIVE

CLIFTON MENEZES

**EXECUTIVE VICE-PRESIDENT
CAPGEMINI INDIA**

'THE ROLE OF AI IN REVOLUTIONIZING INDO-FRENCH INDUSTRIES'

The rapid advancements in Artificial Intelligence (AI) have triggered transformative changes across industries worldwide, and the Indo-French industrial collaboration is no exception. With their unique strengths and shared vision for innovation, both India and France, are leveraging AI to redefine traditional sectors, enhance productivity, and pave the way for a sustainable future.

India, known for its IT prowess and skilled workforce, and France, recognized for its strong engineering capabilities and cutting-edge research, are combining forces to integrate AI into key industries.

According to the European skills forecast report, The Artificial Intelligence (AI) market in France is expected to see a significant growth in the coming years. Forecasts show a 27.67% increase from 2025 to 2030, reaching approximately \$826.70 billion by 2030, indicating a substantial need for AI expertise while demonstrating the country's commitment to integrate AI across all industries for innovation and efficiency.

BHARAT DHAWAN

**MANAGING PARTNER
FORVIS MAZARS, INDIA**

'DECODING TRADE POLICIES: HOW INDIA AND FRANCE CAN NAVIGATE NEW REGULATIONS'

In an increasingly intricate global trade landscape, businesses must navigate through evolving regulations, trade agreements, and geopolitical factors that have become essential checkpoints. It is crucial for companies operating across borders to comprehend the potential implications of these factors and capitalize on emerging opportunities.

In today's globalized world, international trade is a fundamental driver of economic growth and bilateral relationships. The trade ties between India and France are critical, given their shared interests in technology, manufacturing, services, and more. However, the landscape of global trade is constantly evolving, and both countries face the challenge of adjusting to shifting trade policies. Understanding and adapting to these changes is essential for businesses looking to maintain competitive advantage and long-term success.

FM Logistic , Experts in Sustainable, Tech-Driven Supply Chain Solutions

At **FM Logistic**, we are shaping the future of global supply chains with a strong **focus on sustainability and innovation**. With over 55 years of expertise, we are proud to be a trusted partner for businesses worldwide. Our strategy revolves around **optimizing supply chains** and leveraging **advanced technologies** to drive efficiency and growth.

OMNICHANNEL FULFILLMENT

We provide seamless, **multichannel logistics solutions** that ensure your products reach consumers, wherever they shop—whether online, in-store, or through a hybrid model.

CONTROL TOWER SERVICES

Our **Supply Chain Control Tower** offers real-time visibility and proactive management across your entire logistics network, enabling greater control and agility in responding to market demands.

SUPPLY CHAIN OPTIMISATION

We focus on **cost efficiency, responsiveness, and scalability**, optimizing your logistics operations to meet the demands of a dynamic marketplace.

TECHNOLOGY-BASED SOLUTIONS

With cutting-edge **automation and digitization** tools, we empower your supply chain to become more efficient, transparent, and adaptable to changing consumer needs.

SUSTAINABLE DEVELOPMENT

Sustainability is at the heart of everything we do. We reduce environmental impact through **green logistics** solutions.

Our **LEED-certified warehouse** sets the standard for energy-efficient, sustainable operations. These efforts help our clients meet their sustainability goals.

COMPLIANCE

FM Logistic ensures **strict adherence to local and international compliance** standards across all our operations. We maintain a robust framework to meet regulatory requirements and industry best practices, giving you peace of mind that your supply chain is in safe hands.

Ready to Transform Your Supply Chain?

INDUSTRY PERSPECTIVE

MAUD LEBARS

**SOUTH ASIA AREA MANAGER
OMNES EDUCATION**

'BRIDGING TALENT GAPS: INDO-FRENCH INITIATIVES IN SKILL DEVELOPMENT'

With the largest population on Earth, one may question the notion of “talent gap” for India. Employers have a huge talent pool to look for. And yet, according to EY’s Future of Pay Report 2023, prominent trends in India include the expansion of the talent pool, shortages of skilled professionals, heightened competition for top talent, and the imperative of continuous upskilling.

When looking for freshers, campus placement allows to find talents though 51% of young graduates are considered not employable according to the Economic Survey 2023 2024. Once looking for less junior profiles, it becomes difficult to navigate this ocean of profiles for HR managers. Attrition and war on skilled talents is starting.

More generally, it is interesting to note that nowadays, a skill has an expectancy of 2 years only of relevance only according to recent surveys by OCDE, versus 30 years in the 1990s. So the world belongs now to those who know how to learn, are agile, versatile and adaptable.

INDUSTRY PERSPECTIVE

HARISH SARMA

**MARKETING & PRODUCT DIRECTOR
PLUXEE INDIA**

'TOP TRENDS THAT SHAPED EMPLOYEE BENEFITS IN 2024 AND WHAT TO EXPECT IN 2025'

Employee benefits are undergoing a significant transformation, shaped by an ever-evolving workforce dynamics, economic shifts as well as accelerating technological adaptation. According to an [SHRM survey](#), employers offered an average of 175 benefits two years ago. By 2024, this figure rose to 216—a 23% increase—with further growth anticipated in 2025.

While traditional benefits like retirement plans, and paid leave remain core, 2024 saw the rise of holistic health and wellness benefits such as menopause support and grandparent leave. Globally, innovative policies like the four-day workweek are gaining momentum, with companies in Australia, Canada, and Germany [reporting](#) improved productivity and employee well-being.

In India, the evolution of employee benefits is ongoing, presenting a significant scope of understanding for employers: identifying the benefits that will effectively attract and retain talent while aligning with business objectives.

'CELEBRATING DIVERSITY – WOMEN LEADERS AND INCLUSIVE GROWTH'

A lone woman may not be able to change the world, but she can cast a stone across the water to make many ripples

Social media has been abuzz lately on what the corporate world should or should not demand as work ethics for achieving excellence, or what dedication to work must look like.

As we each go through our professional journeys, we are also simultaneously navigating the paths of our personal lives, juggling the myriad roles that we all must play in the 24 hours that we are afforded. Whether as sons or daughters to aged parents, as wives or husbands or partners to our significant others, as parents to our children, friends to our near and dear ones and many more. Just as the professional life demands our time and energy, so does the fulfilment of each of these other roles.

INDUSTRY PERSPECTIVE

RAJKIRAN KANAGALA

**PRESIDENT & CBO
TRANSPORT CORPORATION OF INDIA LTD.**

'THE QUICK COMMERCE BOOM IN INDIA: A GOLDEN OPPORTUNITY FOR FRENCH PRODUCTS'

The rapid rise of quick commerce in India has transformed the retail landscape, creating significant opportunities for French products such as luxury goods, cosmetics, perfumes, gourmet food items and high-end fashion products. This article delves into the emergence of this trend, the crucial role of temperature-controlled logistics, the expansion into Tier 2 and Tier 3 towns, the challenges faced by businesses, and the impact of upcoming trends.

The Emergence of Quick Commerce in India

Quick commerce, known for ultra-fast delivery within 10 to 30 minutes, has gained immense popularity in India. Initially focused on groceries and daily essentials, it now includes a wide range of products, including cosmetics, fruit-wines, high-end fashion & luxury items. The convenience and immediacy of quick commerce platforms have driven exponential growth in this segment.
